

hideaway. performance: FY24, FY25 and FY26 vs beauty benchmarks

Oct 6, 2026 · @Steven Evans

Summary

Over three years, hideaway. has sold **A\$29.1M across 379,000 orders to 247,000 customers**. The website converts better than most beauty stores. Where it falls short is checkout, basket size and getting customers to come back.

Three things to know:

1. **The website sells well.** About 2.4% of visitors buy, against a typical Shopify store at 1.4%.
2. **We lose too many people at checkout.** Only 4 in 10 shoppers who start checkout finish, against 5 in 10 for a typical store. Since July 2026 it has dropped to about 3 in 10.
3. **Customers don't come back often enough.** The average customer orders 1.3 times a year, against 1.8–2.8 for beauty brands. Our average order is about A\$71 before GST, against about A\$120 across beauty.

Year by year

Each year runs October to September and stands on its own, so the years can be compared directly. Money is AUD.

Sales and customers

	FY24 (Oct 23 – Sep 24)	FY25 (Oct 24 – Sep 25)	FY26 (Oct 25 – Sep 26)	Benchmark
Sales (incl. GST)	A\$6.2M	A\$12.9M	A\$10.0M	—
Orders	79,700	171,300	128,000	—
Customers	59,500	132,000	98,700	—
New customers	39,100	101,200	69,200	—
Average order (incl. GST)	A\$77.36	A\$75.45	A\$78.37	~A\$120 ex-GST (beauty)

	FY24 (Oct 23 – Sep 24)	FY25 (Oct 24 – Sep 25)	FY26 (Oct 25 – Sep 26)	Benchmark
Orders per customer	1.34	1.30	1.30	1.8–2.8 (beauty, estimate)
Customers who came back	43.6%	35.3%	40.8%	20–35% (beauty, estimate)
New customers who reorder within 60 days	12.7%	9.8%	10.0%	17% within 180 days (health & beauty)
Profit per customer (after product and shipping)	A\$62	A\$58	A\$61	—

Website

	FY24	FY25	FY26	All Shopify stores (not beauty-specific)
Visits	2.7M	6.9M	5.1M	—
Visitors who add to cart	8.4%	8.1%	8.3%	6.5%
Visitors who buy (conversion)	2.82%	2.35%	2.44%	1.4%
Shoppers who finish checkout	40.0%	39.7%	40.9%	53%
Visits on mobile	83%	93%	93%	70%

What the years show:

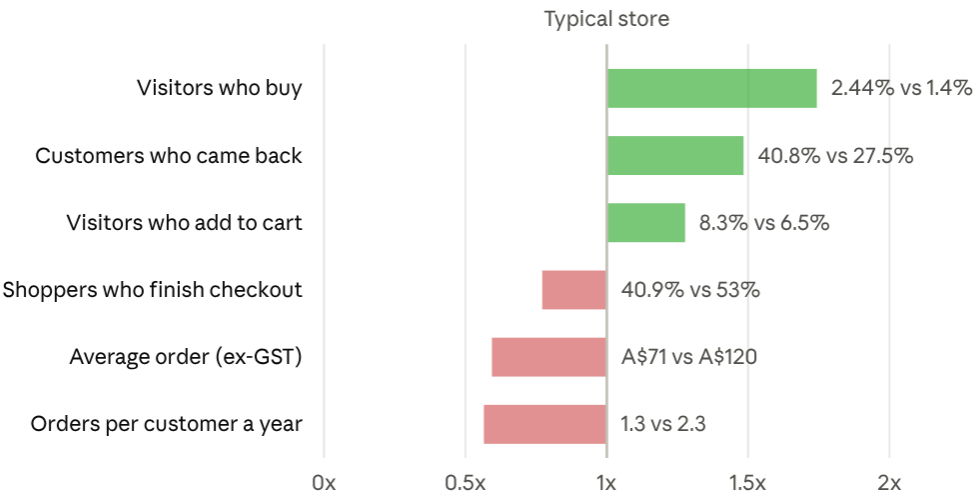

- **FY25 was the growth year.** Sales doubled and new customers rose 2.6 times, but each customer was worth slightly less.
- **FY26 shrank by 22%,** yet per-customer value held steady. The drop came from fewer customers, not weaker ones.
- **Conversion was best in FY24 (2.82%)** and has sat around 2.4% since, still well above the typical store.
- **Checkout has been stuck at about 40% every year.** In September 2026 it fell to 26.5%.
- **Reordering within 60 days fell from 12.7% in FY24 to about 10%,** and July 2026's group was the lowest yet at 6.1%.

How we compare with the beauty industry

We're better than a typical store at turning visits into sales. We're behind on checkout, order size and repeat orders.

Ahead on getting people to buy; behind on checkout, order size and repeat orders

hideaway. (last 12 months) compared with a typical store. 1.0 = typical; right of the line is better.

hideaway.: Shopify, Oct 2025 – Sep 2026 · Typical store: Littledata Shopify medians, Dynamic Yield beauty AOV, Retention Side beauty ranges (midpoints)

Measure	hideaway. (FY26)	Benchmark	What the benchmark covers
Visitors who buy	2.44%	1.4%	All Shopify stores (Littledata, 2026)
Visitors who add to cart	8.3%	6.5%	All Shopify stores (Littledata, 2026)
Shoppers who finish checkout	40.9%	53%	All Shopify stores (Littledata, 2026)
Average order (ex-GST)	A\$71	~A\$120	Beauty (Dynamic Yield, 2026)
Customers who came back	40.8%	20–35%	Beauty, estimate (Retention Side, 2026)
Orders per customer a year	1.3	1.8–2.8	Beauty, estimate (Retention Side, 2026)
New customers who reorder	~10% within 60 days	17% within 180 days	Health & beauty (Lifetimely, 2026)

Measure	hideaway. (FY26)	Benchmark	What the benchmark covers
Orders returned	1.2%	19.3%	All online retail (NRF, 2025)

About half of these benchmarks are beauty-specific. The rest are averages across all Shopify stores, because no beauty-only figure is published. Dynamic Yield does publish a beauty conversion rate of 5.38%, but it comes from large enterprise retailers, not Shopify brands our size, so the Shopify median is the fairer comparison. US figures are converted at A\$1.52.

What we're doing about it

None of these needs more ad spend. Each one gets more out of the customers we already pay to bring in.

- 1. Fix checkout.** Get completion from 26.5% back to 41% within 30 days, then to 50%. That's worth about A\$46k a month in profit at September's volume.
- 2. Bring customers back.** Use Klaviyo emails at days 21, 45 and 60 after a first order. Target: 12% of new customers reordering within 60 days, and 1.6 orders per customer a year.
- 3. Grow the average order.** Lead with bundles ("add 2 more for a set price"). Target: A\$90 incl. GST, up from A\$78.
- 4. Restart new-customer growth at a profit.** New customers fell to 55 in the first week of October. Restart ads once checkout is fixed, with a limit of A\$55 to win each new customer.

12-month targets

Measure	Now	Target
Visitors who buy	2.44%	2.8%
Shoppers who finish checkout	40.9% (Sep: 26.5%)	50%
Average order (incl. GST)	A\$78	A\$90
Orders per customer a year	1.3	1.6
New customers reordering within 60 days	10% (Jul: 6.1%)	12%
Visitors who add to cart	8.3%	10%

Notes and sources

- **Our numbers** come from Shopify, Oct 2023 – Sep 2026. The store moved to a new Shopify account in August 2026; both stores are combined and nothing is double-counted.
- **Profit per customer** means sales after GST, minus product cost (A\$20.50 an order) and shipping (A\$14 an order). It's before ad spend, wages and overheads.
- **The 60-day reorder rate** follows each month's new customers for about 60 days.
